

M8/M12 Circular Connectors

Accessories

Adapter

Adapters are useful to reduce the amount of different parts on stock or on Bill Of Materials. Sometimes there are automation components on the market which are available only as M8 or M12 size. In many cases this requires a multitude of connectors from both technologies.

With adapters this can be reduced to one system, M8 or M12, that is easily manageable.

Adapters are also recommended for service issues i.e. replacement of cables as they allow greater flexibility.
