Notification Regarding Changes to 14-Digit Part Number Panel Mount Indicator Assembly

Dear Valued Website Visitors,

We hope this message finds you well. We would like to inform you about a change in the availability of the full part assembly for our Classic Panel Mount Indicators associated with the 14-digit part number.

The 14-digit part number in question historically represented a complete assembly of both the Base and the Lens Cap. However, we regret to inform you that Dialight no longer offers the complete assembly under this specific 14-digit part number.

Not to worry, though! Bases and Lens Caps are still available as individual SKUs. For detailed information on individual SKUs that collectively form the complete assembly, please refer to the SPECIFICATIONS section under the relevant 14-digit SKU page on our website.

We understand the importance of a seamless experience for our customers. As a value-added service, some of our distribution partners still offer the complete assembly. You can find these offerings via the respective 14-digit part numbers on their respective websites.

Thank you for your understanding, and we appreciate your continued partnership with Dialight. If you have any further questions or need assistance, please don't hesitate to reach out to our customer support team.

Best Regards,

Your Dialight Signals & Components Team
